Bug Fix

1. On http , console will display unrecognizable characters that makes IXP internal test fail.

Not a bug:

1. When <press any key to continue> appear,you don't press any key and it will automatically list next for some sec. It's more convenient to list next manually for check.

2. When set WRR and send traffic, Q0 doesn't match the setting.
3. Create two Epon profiles with different Delay value (one is Low Delay, another is High Delay) and apply to two ONU, then use Smart Flow to test latency. It can't work normally.
- 4.
