

## ZyXEL Prestige P128IMH 2.21(K.04) Release Note

---

**Date: December 19, 2001**

This document describes the bug fixed since version 2.21(K.04).

### ***Bug fixes***

---

1. Fix the problem that router may crash after receiving UDP NULL packet during port sacn security check from URL "www.security-check.ch".

### ***Supported Platforms***

---

V2.21(K.04) supports Prestige model: P128IMH.

### ***Known Problem List***

---

1. For DSS-1 version, a global digital call will still ring and can be answered even if **MSN** is selected in Menu 2 as the ***incoming call matching*** method.
2. The POTS port (A/B adapter) dial tone may disappear if call bumping is attempted twice in rapid succession on a switch that does not support in-band tone.
3. For DSS-1 version, Prestige may stop placing outgoing data calls after Call Waiting/Call Hold/ Call Retrieve scenario if both of POTS ports are assigned the identical phone number. When it happens, the B-channel status shown on Menu 24.1 is wrong.
4. Prestige performance will be degraded if there exists a telnet session in Menu 24.1 via LAN at the same time.
5. The internal modem can't call back when callback is needed in Menu 11.

### ***To Upgrade Prestige***

---

Get the files from ZyXEL anonymous FTP server (ftp.zyxel.com). Upgrade your Prestige by following the instructions for your model:

#### **P128IMH**

Versions:

ZyNOS F/W Version - V2.21(K.04) | 12/19/2001  
ISDN F/W Version - DSS1: V 09D

RAS and ISDN firmware files:

221k04c0.bin ( for DSS1 )
