ISSN 1201-561X

# *THEORY AND APPLICATIONS OF CATEGORIES*

Volume 10, 2002

A survey of definitions of $n$-category
Tom Leinster 1

A homotopy double groupoid of a Hausdorff space
Ronald Brown, Keith A. Hardie, Klaus Heiner Kamps, Timothy Porter 71

Entity-relationship-attribute designs and sketches
Michael Johnson, Robert Rosebrugh and R.J. Wood 94

Homology of Lie algebras with $\Lambda/q\Lambda$ coefficients and exact sequences
Emzar Khmaladze 113

Exponentiability of perfect maps: four approaches
Susan Niefield 127

Coherence for factorization algebras
Robert Rosebrugh and R.J. Wood 134

More on injectivity in locally presentable categories
J. Rosický, J. Adámek and F. Borceux 148

Colocalizations and their realizations as spectra
Friedrich W. Bauer 162

© The Editors of Theory and Applications of Categories 2002. Permission to copy for private use granted.

On some properties of pure morphisms of commutative rings
Bachuki Mesablishvili 180

Change of base, Cauchy completeness and reversibility
Anna Labella and Vincent Schmitt 187

Derived operations in Goguen categories
Michael Winter 220

Sober spaces and continuations
Paul Taylor 248

Subspaces in abstract Stone duality
Paul Taylor 301

Directed homotopy theory, II. Homotopy constructs
Marco Grandis 369

The cyclic spectrum of a Boolean flow
John F. Kennison 392

Simultaneously reflective and coreflective subcategories of presheaves
Robert El Bashir and Jiří Velebil 410

Entropic Hopf algebras and models of non-commutative logic
Richard F. Blute, François Lamarche and Paul Ruet 424

HSP subcategories of Eilenberg-Moore algebras
Michael Barr 461

Opmonoidal monads
Paddy McCrudden 469

A duality relative to a limit doctrine
C. Centazzo and E.M. Vitale 486

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

The method of distribution of the journal is via the Internet tools `WWW/ftp`. The journal is archived electronically and in printed paper format.

Subscription information. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to `tac@mta.ca` including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor, Robert Rosebrugh, `rrosebrugh@mta.ca`.

Information for authors. The typesetting language of the journal is TEX, and LATEX is the preferred flavour. TEX source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal's WWW server at `http://www.tac.mta.ca/tac/`. You may also write to `tac@mta.ca` to receive details by e-mail.

Editorial board.
