ISSN 1201-561X

THEORY AND APPLICATIONS OF CATEGORIES

Volume 11, 2003

Categorical models and quasigroup homotopies
George Voutsadakis 1

Morphisms and modules for poly-bicategories
J.R.B. Cockett, J. Koslowski, and R.A.G. Seely 15

The branching nerve of HDA and the Kan condition
Philippe Gaucher 75

Isomorphisms between left and right adjoints
H. Fausk, P. Hu, and J.P. May 107

The Wirthmüller isomorphism revisited
J.P. May 132

Characterization of protomodular varieties of universal algebras
Dominique Bourn and George Janelidze 143

Resolutions by polygraphs
François Métayer 148

Cubical sets and their site
Marco Grandis and Luca Mauri 185

© The Editors of Theory and Applications of Categories 2003. Permission to copy for private use granted.

Characterization of Pointed Varieties of Universal Algebras with Normal Projections
Zurab Janelidze 212

Some algebraic applications of graded categorical group theory
A.M. Cegarra and A.R. Garzón 215

Continuous categories revisited
J. Adámek, F. W. Lawvere, J. Rosický 252

Ring epimorphisms and $C(X)$
Michael Barr, W.D. Burgess and R. Raphael 283

Partial toposes
Jean Bnabou and Thomas Streicher 309

Some calculus with extensive quantities: wave equation
Anders Kock and Gonzalo E. Reyes 321

Exponentiability in categories of lax algebras
Maria Manuel Clementino, Dirk Hofmann and Walter Tholen 337

The category of opetopes and the category of opetopic sets
Eugenia Cheng 353

Modules
J.R.B. Cockett, J. Koslowski, R.A.G. Seely, and R.J. Wood 375

Symmetric monoidal completions and the exponential principle among labeled combinatorial structures
Matias Menni 397

Composition-representative subsets
Gary Griffing 420

The strong amalgamation property and (effective) codescent morphisms
Dali Zangurashvili 438

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

The method of distribution of the journal is via the Internet tools `WWW/ftp`. The journal is archived electronically and in printed paper format.

Subscription information. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to `tac@mta.ca` including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor, Robert Rosebrugh, `rrosebrugh@mta.ca`.

Information for authors. The typesetting language of the journal is TEX, and LATEX is the preferred flavour. TEX source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal's WWW server at `http://www.tac.mta.ca/tac/`. You may also write to `tac@mta.ca` to receive details by e-mail.

Editorial board.
John Baez, University of California, Riverside: `baez@math.ucr.edu`
Michael Barr, McGill University: `barr@barrs.org`, *Associate Managing Editor*
Lawrence Breen, Université Paris 13: `breen@math.univ-paris13.fr`
Ronald Brown, University of Wales Bangor: `r.brown@bangor.ac.uk`
Jean-Luc Brylinski, Pennsylvania State University: `jlb@math.psu.edu`
Aurelio Carboni, Università dell Insubria: `aurelio.carboni@uninsubria.it`
Valeria de Paiva, Palo Alto Research Center: `paiva@parc.xerox.com`
