Dear Michael,

As the Chairman of IEEE 802.11 and on behalf of the working group, I wish to express appreciation for your efforts in developing the MAC Formal Description. Developing a document of this magnitude is no small task. It not only required you to learn the SDL specification language, which is a major accomplishment in itself, but also required mastering the software tools and finding complicated methods around imperfections to achieve the objectives.

Your efforts have directly improved the accuracy and completeness of the standard through the discovery of several inconsistencies in the base document that can now be rectified.

Your considerable background and experience with the standard was essential in developing this document. You are definitely an asset to the organisation and I wish to express my gratefulness and the gratitude of IEEE 802.11 for a job well done!

Best regards

Vic Hayes, Chair IEEE P802.11
